**Subject: Phishing alert: Users being directed to fake Raven login page**

Dear IT colleagues,

Over the last few days users have reported receiving phishing emails warning of an imminent expiration of access to a Cambridge University Library system. The links within the email direct users to a fake Raven login page.

**If users have entered their credentials onto this fake site they must change their password as soon as possible.**

You may wish to direct users to the advice on our website: [www.uis.cam.ac.uk/phishing](http://www.uis.cam.ac.uk/phishing)

Users may also find our Stay Safe Online training course  
helpful: <https://www.vle.cam.ac.uk/course/view.php?id=137361>

We'd also recommend that users install the University's McAfee Endpoint Security and use it to scan their machines: [www.uis.cam.ac.uk/antivirus](http://www.uis.cam.ac.uk/antivirus)

If users need further assistance because they've clicked on the link or opened an attachment in a suspicious email, please feel free to direct them to the UIS Service Desk: [servicedesk@uis.cam.ac.uk](mailto:servicedesk@uis.cam.ac.uk)

Communications Group
